

Week	Task ID	Task Description	Subtasks
1	B1	Audio Dataset Acquisition	Collect meows labeled by emotion (Happy, Fear, etc.).
	B2	Audio Feature Extraction	Use Librosa to extract MFCCs and Spectrograms.
	B3	Audio Cleaning	Implement noise reduction and silence removal.
	B4	EDA: Audio Visuals	Plot pitch and intensity distributions.
2	B5	RNN/LSTM Architecture	Design layers for sequential audio data.
	B6	Model Training (Audio)	Train the meow-emotion classification model.
	B7	Audio Feature Selection	Identify which audio features impact prediction most.
	B8	Audio Model Evaluation	Plot Precision-Recall curves for meow classes.
3	B9	Streamlit App Setup	Build the main UI layout (Sidebar, Upload Area).
	B10	Frontend Visualizations	Create dynamic charts for confidence scores.
	B11	Media Handling	Code the "Drag & Drop" logic for both files.
	B12	Integration: Audio to Model	Connect frontend to the saved Audio model weight file.
4	B13	UI/UX Refinement	Polish CSS, fonts, and "MeowMood" branding.
	B14	User Acceptance Testing	Test app on different browsers and devices.
	B15	Final Project Report	Summarize user feedback and future improvements.
